Faculty of Applied Sciences, Computing Programme

Final Year Project: Text Detection and Recognition in Image-Based on Deep Learning

Data collection agreement

Note: This data collection is entirely voluntary

The content of this data collection is what people transcribe from the knowledge points we provide on Chinese history. The collected data will be used to generate history quiz paper data. And all the generated data will be used to train the neural network model. Please read the contents below carefully before submitting.

*** All knowledge points are from the Internet and do not represent personal views.**

Data Protection

1. All the Information we collect is just for research and not stored.
2. Sensitive data will not be collected

Participants rights

1. The participant can withdraw from the research at any time and for any reason without penalty.

Signing below means that you have fully read the contents of this agreement and are fully aware of your rights.
